

INSTRUCTIONS

MODEL : SUZUKI GLADIUS

PRODUCT : REAR HUGGER

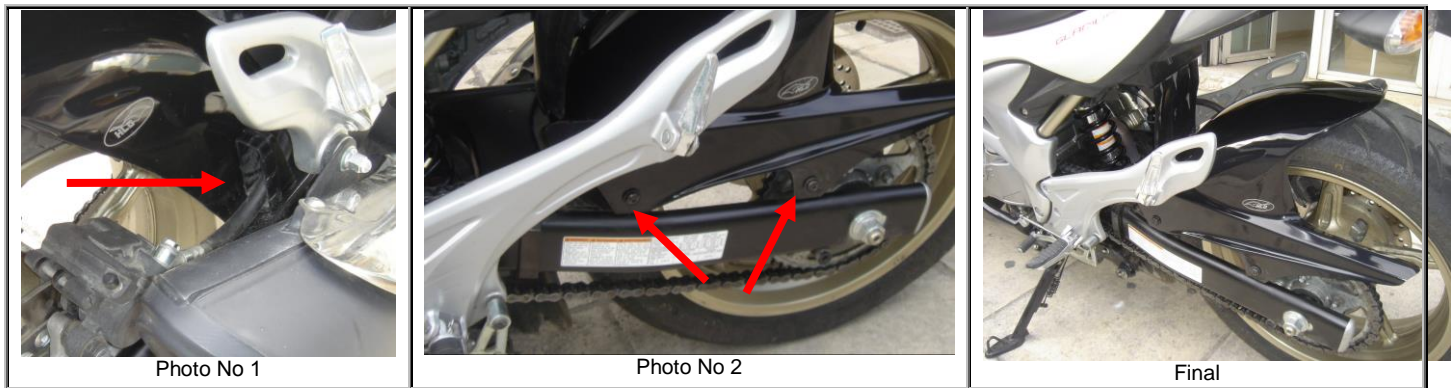

CODE : RH-SGLADIUS

CONTENTS

ABS plastic wing
2pcs. M6x15 bolts
2pcs. Rubber washers

MATERIAL SPECIFICATIONS

The product's material, made of **ABS** plastic with acrylic exterior layer, can be placed on your bike without requiring painting but if you want it painted, all paint companies have equivalent machinery at their disposal. If you want to paint it yourself, you should contact them to inform you on what you will need and how to do it.

Placement

OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF

- Remove the chain guard.
- Clean well the area around the swing arm
- Remove the base that holds the rear brake tube.
- Remove the protective membrane of the hugger.
- Put the hugger in place (insert the right side of the wing beneath the brake tube).
- Bolt on the right side of the wing the base of the rear brake tube (while holding it together with the wing), and then the left in the old location of the chain guard.
- Before you tighten the screws make sure that the wing has been positioned correctly (centered on the wheel).
