### Placement

#### **OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF**

- Remove the entire plastic mud guard of the motorcycle.
- Place the new holder in the place of the old one.
- Slide the wires through the central hole if you intend to put a flash on.
- Place the plate number and adjust it to the angle you prefer.
- The holder has three extra holes in case you want to use smaller flashes on each side, as well as a lamp plate.
- To rotate and turn inwards, unscrew the last piece of the plate holder.
- Tighten all the screws.
