### Placement

#### OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF

- Remove the flash, the plate's light and the original base plate.
- Undo the two bolts which are under the tray and place the new number plate.
- Screw the new bolts on as shown in Photo No 1.
- Adjust the plate to the angle you prefer.
- The holder has three extra holes in case you want to use smaller flashes on each side, as well as a lamp plate.
- To rotate and turn inwards, unscrew the last piece of the plate holder.
- Tighten all the screws.
